

BT350 and BT450 are heavy-duty and reliable upright vacuum cleaners, with a cylindrical rotating brush, designed to vacuum carpet deeply. Two sizes are available, for cleaning large or smaller areas.

The action of the rotating brush allows to remove dust, sand and solid dirt residuals from the carpet fibres.

It is very important to use an upright vacuum cleaner with rotating brush on a daily basis, to maintain carpet in better conditions and extend the life time of the carpet as well. It is also an essential operation before carpet cleaning.

Advantages of BT350 and BT450

1. The low profile and the ability to continue to operate when the handle is completely flat to the floor allows the BT350 and BT450 to clean under furniture.
2. Superior edge cleaning allows for deep carpet cleaning along the baseboard.
3. The on-board wand and stretch hose (4:1) provide for quick and easy cleaning of hard to reach areas.
4. The power heads have a multilevel manual adjustment (4 positions) to give superior results on all levels of flooring.
5. The brush motor is electronically protected against overload and the LED light system assures the that the setting is correct.
6. Easy-to-replace brush strips. There is no need of replacing the entire roller system when the brush strips are worn out.
7. The optional HEPA H13 filter provides the cleanest air quality available.

Technical Data

	BT350	BT450
Cleaning width:	350 mm	450 mm
Dust bag capacity	6,5 l	6,5 l
Full bag indicator:	electronic	electronic
Vacuum motor power:	800 W	800 W
Max waterlift:	2500 mm H ₂ O	2500 mm H ₂ O
Max air flow:	max 43 l/sec	max 43 l/sec
Exhaust air filtering system:	- Standard: washable filter - Optional HEPA filter	- Standard: washable filter - Optional HEPA filter
Brush motor:	200W 5000 rot/min	250W 4000 rot/min
